US EPA RECORDS CENTER REGION 5

We have your letter of the 27th with which you have a copy of the preliminary report made by Mr.Kempe of the State Board of Health. Mr.Edwards is our technical man to handle this matter and he is on his vacation. He left the very day you wrote your letter, the 27th. He does not return until August 11th. If Mr.Kempe is waiting for a reply from us to this preliminary report will you please explain to him Mr.Edwards, the one who would have this problem to study, is away on his vacation; that he returns on the 11th of August and probably within a week thereafter we can get a reply to Mr.Kempe. It should not make any difference to Mr. Kempe if we get him his reply any time within the next thirty days.

Did Mr.Kempe in any way indicate what he would wish us to do? If we have anything to do it would be much better for us to make the remedy promptly and without exciting our neighbors who if it becomes too public would immediately embarrass and annoy us with suits interminable. Please advise us if a reply to his report by the latter part of August would be satisfactory to him.
